

# PULSE-IPT

## Standard Operating Procedures

AEWTTR Integrated Product Team

Effective Date: July 2026 · Version 1.0

This document defines the standard operating procedures for all workflows within PULSE-IPT, the AEWTTTR Integrated Product Team's operations workspace. Each SOP covers the purpose, responsible parties, and step-by-step procedure for a specific capability.

|                |                                         |
|----------------|-----------------------------------------|
| Document Type  | Standard Operating Procedure            |
| System         | PULSE-IPT (SharePoint SPA)              |
| Maintained By  | AEWTTR IPT Program Management           |
| Audience       | All AEWTTTR IPT Personnel               |
| Review Cycle   | Annually or upon major system update    |
| Classification | For Official Use — AEWTTTR IPT Internal |

## Table of Contents

|               |                                                      |                                               |

## SOP 01

## Dashboard

|                    |                                                                     |            |                     |
|--------------------|---------------------------------------------------------------------|------------|---------------------|
| <b>Purpose</b>     | Understand how to read the Dashboard and navigate to other modules. | <b>Who</b> | All PULSE-IPT users |
| <b>When to Use</b> | Upon login; at the start of any work session.                       |            |                     |

## Procedure

1. Open PULSE-IPT via the SharePoint launcher. The Dashboard loads automatically.
2. Review the **Executive Summary** panel — it shows each project's RAG (Red/Amber/Green) status, completion percentage, and blocked task count.
3. Click any project row in the summary to jump directly to that project's workspace.
4. Use the **top navigation bar** to move between major modules: My Overview, Team Overview, Projects, Weekly Meeting, Travel, Document Review, and Admin.
5. The **notification bell** (top right) shows pending items requiring your attention — new travel requests, documents awaiting review, and tickets assigned to you.
6. The **theme toggle** switches between light and dark mode. Your preference is saved automatically.

Dashboard — RAG project summary with navigation bar

**Note:** RAG status is computed automatically from task health and completion percentages — it is never manually typed. If a project shows Red, check its blocked tasks first.

| SOP 02My Overview |                                                                                                    |     |                     |
|-------------------|----------------------------------------------------------------------------------------------------|-----|---------------------|
| Purpose           | Review your personal year-in-review metrics: tasks, documents, meetings, and travel.               | Who | All PULSE-IPT users |
| When to Use       | At the start of a work session; during performance reviews; any time you want a personal snapshot. |     |                     |

Procedure

1. Click **Overview** in the top navigation bar.
2. The default view is **My Overview**. If the Team Overview is showing, click the **My** tab at the top of the page.
3. Read the **hero section**: it shows your name, open task count, number of assigned projects, and the current date.
4. Review the **year-in-review metrics**: Tasks Completed (this year), Docs Reviewed, Docs Signed, Meetings attended, Travel Requests, and total assigned Projects.
5. Use the quick-action buttons — **My Projects**, **Document Review**, **Weekly Meeting** — to navigate to the relevant module.
6. In the **My Tasks** panel, use the filter pills (All / Open / No Date / Completed) to focus on a task subset. Click any task row to open that project's workspace.
7. In the **My Projects** panel, each row shows a project you are assigned to. Click to open.
8. The **Needs Attention** panel (shown only when applicable) flags documents awaiting your review or upcoming travel items.

My Overview — personal year-in-review dashboard with task filters and project list

**Note:** My Overview only shows tasks, documents, meetings, and travel where *you* are the assignee, reviewer, or traveler. It is scoped to your profile automatically.

| SOP 03Team Overview |                                                                                                                    |     |                                              |
|---------------------|--------------------------------------------------------------------------------------------------------------------|-----|----------------------------------------------|
| Purpose             | Get a leadership-level snapshot of the entire portfolio: projects, open tasks, blockers, risks, and team activity. | Who | Program Managers, leadership, and team leads |
| When to Use         | Weekly IPT meeting prep; leadership briefs; any time a portfolio-level view is needed.                             |     |                                              |

Procedure

1. Click **Overview** in the top navigation bar.
2. Click the **Team** tab to switch from personal to team view.
3. Read the **Team Snapshot** panel: Active Projects, Open Tasks, Blocked Tasks, Open Risks, Docs in Review, Pending Travel.
4. If **Blocked Tasks** is non-zero (shown in red), click the number or navigate to the relevant project to resolve.

→ Blocked tasks require active resolution — they do not auto-clear.
5. Use the inner tabs to drill down:
6. — **Portfolio**: RAG rollup of all active projects with completion and blocked counts.
7. — **Workload**: How many open tasks each person currently has.
8. — **Resources**: Team roster with roles, functional areas, and project assignments.
9. — **Operations**: Pending travel requests and documents currently in review.
10. Use the **All Projects** and **Team Members** buttons to navigate to those modules.

Team Overview — Workload tab showing open task distribution per person

**Note:** Team Overview aggregates data from all projects in the portfolio. It is read-only — use individual project workspaces to make changes.

|             |                                                                                       |     |                     |
|-------------|---------------------------------------------------------------------------------------|-----|---------------------|
| SOP 04      | Projects — Portfolio View                                                             |     |                     |
| Purpose     | Browse, search, and filter the project portfolio to find and open a specific project. | Who | All PULSE-IPT users |
| When to Use | Any time you need to navigate to a project workspace.                                 |     |                     |

Procedure

1. Click **Projects** in the top navigation bar.
2. The default filter shows **My Projects** — only projects where you are a member. Click **All Projects** to see the complete portfolio.
3. Use the **search bar** to filter by project name.
4. Use the **Priority** dropdown to filter by priority level (Immediate, High, Medium, etc.).
5. Click any project row to open that project's workspace.
6. To create a new project, click **New Project** (top right). Admin or PM role required.

Projects — portfolio table with search and priority filter

SOP 05

## Project Workspace — Home & Roster

|                    |                                                                                   |            |                                      |
|--------------------|-----------------------------------------------------------------------------------|------------|--------------------------------------|
| <b>Purpose</b>     | Orient to a project's status and manage its team roster.                          | <b>Who</b> | Project members, PMs, and team leads |
| <b>When to Use</b> | When joining a project; beginning of a work session; checking a project's health. |            |                                      |

### Procedure

1. Open any project from the Projects portfolio view.
2. The **Home** tab (default) shows: project description, RAG status, completion ring, and a summary of open tasks, documents, and blockers.
3. Review the **Risks** section — active risks with owner and status are listed here.
4. Click the **People** tab to view the project roster.
5. The People tab shows each member's name, role, functional area, and task assignment count.
6. To add a member, click **Add Member** and select from the team roster (PM or Admin role required).
7. To remove a member, click the remove icon next to their row (PM or Admin role required).

Project Home — RAG status, completion ring, and risk summary

Project People — team roster with roles and task counts

## SOP 06

## Project Tasks &amp; Gantt Tracker

|                    |                                                                                    |            |                     |
|--------------------|------------------------------------------------------------------------------------|------------|---------------------|
| <b>Purpose</b>     | View, create, and manage project tasks; visualize the schedule on the Gantt chart. | <b>Who</b> | All project members |
| <b>When to Use</b> | During task assignment, progress updates, or schedule reviews.                     |            |                     |

## Procedure

1. Open a project and click the **Tracker** tab.
2. The left panel shows all tasks in a flat or grouped list. The right panel shows the Gantt timeline.
3. Click any task row to open the task detail drawer: title, assignee, dates, status, and priority.
4. To **add a task**, click **+ Add Task**. Fill in the title, assignee, start/end dates, and priority.
5. To **update task status**, open the task and change the status field (Not Started / In Progress / Blocked / Done).
6. Drag Gantt bars left or right to adjust dates directly on the timeline.
7. Use the **Group By** control to organize tasks by assignee, status, or priority.
8. Blocked tasks are highlighted in red — resolve the blocker and update the status to move them off the board.

Project Tracker — Gantt chart with task list and timeline

| SOP 07Project Boards & Custom Checklists |                                                                                                  |     |                     |
|------------------------------------------|--------------------------------------------------------------------------------------------------|-----|---------------------|
| Purpose                                  | Use Kanban-style boards and custom checklists for workflow-specific task tracking.               | Who | All project members |
| When to Use                              | For sprint-style work, engineering checklists, or any checklist-based workflow within a project. |     |                     |

Procedure

1. Open a project and click the **Boards** tab.
2. Each board represents a custom workflow. The columns show the workflow stages.
3. Drag cards between columns to advance work through the workflow.
4. Click a card to open the detail view — add notes, assign an owner, or set a due date.
5. To **create a new board**, click **+ New Board** and define the columns.
6. To **add a card** to any column, click the **+** at the bottom of that column.

Project Boards — Kanban-style workflow board with cards

## SOP 08

## Project Documents

|                    |                                                                                      |            |                     |
|--------------------|--------------------------------------------------------------------------------------|------------|---------------------|
| <b>Purpose</b>     | Manage the project's SharePoint document library: upload, link, and track documents. | <b>Who</b> | All project members |
| <b>When to Use</b> | When attaching reference files, deliverables, or contract documents to a project.    |            |                     |

## Procedure

1. Open a project and click the **Documents** tab.
2. The list shows all files linked to this project, with name, type, and last-modified date.
3. Click **Open in SharePoint** to view the full library in SharePoint.
4. To **link a document**, click **Add Document** and paste the SharePoint URL or search by name.
5. To **send a document to formal review**, click the document's row menu and select **Send to Review**. This creates a Document Review record.
6. Documents linked here are for reference; the Document Review module handles formal approval workflows.

Project Documents — linked document library with SharePoint integration

## SOP 09

## Project Settings

|                    |                                                                                                          |            |                             |
|--------------------|----------------------------------------------------------------------------------------------------------|------------|-----------------------------|
| <b>Purpose</b>     | Configure project metadata: name, description, priority, RAG, fiscal year, funding, and program details. | <b>Who</b> | Project Managers and Admins |
| <b>When to Use</b> | At project creation; when funding, priority, or scope changes; during annual portfolio reviews.          |            |                             |

## Procedure

1. Open a project and click the **Settings** tab.
2. Edit the **Project Name** and **Description** fields as needed.
3. Set the **Priority** from the dropdown: Immediate, High, Medium, Lower, Stretch, Exploratory, Ongoing, or Document.
4. Set the **Status**: Active, On Hold, Closed, or Archived.
5. Select the **Fiscal Year** (multi-select tag picker — choose all applicable fiscal years).
6. Select the **Funding Type** (e.g., RDTE, PROC, O&M;).
7. Set the **Funding Status** (e.g., Funded, Unfunded, TBD).
8. Select the **Task Order** if applicable.
9. Select the **Program / End Item** this project belongs to.
10. Click **Save Settings** to apply all changes.

The screenshot displays the 'Project settings' page in the PULSE-IPT system. The interface is organized into a sidebar and a main content area. The sidebar on the left lists navigation options: Home, Notes, People, Documents, Meeting, Tracker, Boards, and Settings. The main content area is titled 'Project settings' and includes a 'Delete project' button. It is divided into several sections: 'IDENTITY' with fields for Project name, Description, and Portfolios; 'STATUS & SCHEDULE' with fields for Priority, Lifecycle, Start, Due, Completed, Change request, and Locations; 'ROLES' with fields for PM, ENGINEER, ISSO, and RANGE POC; and 'PROGRAM & FUNDING' with fields for Task Order, Funding Type, Fiscal Year, Funding Status, Configuration End Item / Product, and Handoff notes. The 'Project name' field is currently set to 'Radar Integration'. The 'Description' field contains the text 'One or two sentences describing this project.' The 'Priority' dropdown is set to 'High'. The 'Lifecycle' dropdown is set to 'None'. The 'Start' and 'Due' date pickers are set to 'mm/dd/yyyy'. The 'Completed' date picker is set to 'mm/dd/yyyy'. The 'Change request' radio buttons are set to 'No'. The 'Locations' field is empty. The 'Funding Type' field is empty. The 'Funding Status' field is empty. The 'Configuration End Item / Product' field is empty. The 'Handoff notes' field is empty.

Project Settings — metadata configuration including fiscal year, funding type, and program tags

**Note:** Fiscal Year, Funding Type, Funding Status, Task Order, and Program fields are tag pickers — you can select multiple values. These fields drive portfolio filtering and reporting.

| SOP 10Project Meeting Tab |                                                                                                 |     |                        |
|---------------------------|-------------------------------------------------------------------------------------------------|-----|------------------------|
| Purpose                   | Review tasks and meeting notes in context of the current project during the weekly IPT meeting. | Who | PM and project members |
| When to Use               | During the Weekly IPT Meeting when presenting a specific project's status.                      |     |                        |

Procedure

1. Open the project whose status you are presenting.
2. Click the **Meeting** tab.
3. The meeting view shows only tasks belonging to *this project* — not all portfolio tasks.
4. Review open, blocked, and completed tasks by assignee.
5. The task table includes status, priority, and due date columns.
6. Use this view during the meeting to walk through the project's task status in real-time.
7. Switch to the Weekly Meeting module (see SOP 11) for around-the-room and cross-project views.

**Note:** The Project Meeting Tab is scoped to the current project. If you need to see all projects simultaneously, use the Weekly IPT Meeting module (SOP 11).

## SOP 11

## Weekly IPT Meeting

|                    |                                                                                                                |            |                                         |
|--------------------|----------------------------------------------------------------------------------------------------------------|------------|-----------------------------------------|
| <b>Purpose</b>     | Run the weekly standing IPT meeting: review tasks by project or person, take notes, and track quarterly Rocks. | <b>Who</b> | Meeting facilitator (PM); all attendees |
| <b>When to Use</b> | During the weekly IPT standup or status meeting.                                                               |            |                                         |

## Procedure

1. Click **Weekly Meeting** in the top navigation bar.
2. Select the **meeting date** from the date picker at the top.
3. **Project View** (default): walks through each project's open and completed tasks. Use the left sidebar to jump to a specific project.
4. **Around the Room**: switches to a person-by-person view. Each team member's tasks are shown in one section. Click the toggle to switch views.
5. Click **Notes** to open the meeting notes panel. Type meeting notes — they are saved automatically.
6. Review and update **Quarterly Rocks** in the Rocks panel. Rocks are high-priority quarterly commitments tracked separately from tasks.
7. Meeting history is visible in the **History** tab — previous meeting notes and status snapshots are stored there.

Weekly Meeting — project view showing tasks by project

Weekly Meeting — around the room view by person

## SOP 12

## Travel — Submitting a Request

|                    |                                                                       |            |                                 |
|--------------------|-----------------------------------------------------------------------|------------|---------------------------------|
| <b>Purpose</b>     | Submit a travel request for approval through PULSE-IPT.               | <b>Who</b> | Any team member planning travel |
| <b>When to Use</b> | At least 5 business days before planned travel (or per local policy). |            |                                 |

## Procedure

1. Click **Travel** in the top navigation bar.
2. Click **New Request**.
3. Fill in all required fields: traveler name, destination, travel dates, purpose, estimated cost, and funding source.
4. Select the associated **Project** if the travel is project-specific.
5. Attach any required pre-approval documents.
6. Click **Submit**. The request moves to Pending Approval status.
7. Track the status of your request in the **My Travel** tab. You will receive a notification when it is approved or returned.

**Submit a Request**  
Start a new TDY, conference, or training travel request.

## SOP 13

## Travel — Approving a Request

|             |                                                                                   |     |                   |
|-------------|-----------------------------------------------------------------------------------|-----|-------------------|
| Purpose     | Review and approve (or return) a team member's travel request.                    | Who | PMs and approvers |
| When to Use | When a notification arrives indicating a travel request is pending your approval. |     |                   |

**Procedure**

1. Click the **notification bell** — pending travel approvals appear there. Or navigate to **Travel** and check the **All Requests** tab.
2. Click the travel request to open its detail view.
3. Review all fields: traveler, dates, destination, purpose, and cost estimate.
4. Click **Approve** to approve the request. The traveler will be notified.
5. Alternatively, click **Return for Revision** to send it back with comments.  
→ Provide a clear reason in the comments field so the traveler knows what to fix.
6. After travel, the traveler submits a **Debrief**. You will receive a notification to review it.

|             |                                                                                       |     |                                                |
|-------------|---------------------------------------------------------------------------------------|-----|------------------------------------------------|
| SOP 14      | Travel Calendar                                                                       |     |                                                |
| Purpose     | View all approved and pending travel across the team on a shared calendar.            | Who | All team members; PMs for scheduling awareness |
| When to Use | When planning meetings, identifying staffing gaps, or coordinating team availability. |     |                                                |

Procedure

1. Click **Travel** in the top navigation bar.
2. Click the **Travel Calendar** tab.
3. Each approved or pending travel request appears as a block on the calendar spanning the travel dates.
4. Hover over a travel block to see the traveler name, destination, and status.
5. Click a travel block to open the full request detail.
6. Use the month navigation arrows to move forward or backward in time.

Travel Calendar — team travel timeline view

| SOP 15 Document Review — Submitting |                                                                                     |     |                                 |
|-------------------------------------|-------------------------------------------------------------------------------------|-----|---------------------------------|
| Purpose                             | Submit a document into the formal review and approval workflow.                     | Who | Document authors and submitters |
| When to Use                         | When a document needs formal team review, concurrence, or signature before release. |     |                                 |

Procedure

- 1. Click **Document Review** in the top navigation bar.
- 2. Click **New Document**.
- 3. Fill in the document title, type, and associated project.
- 4. Paste the SharePoint document URL or attach the file.
- 5. Select the **review group** responsible for review (pre-configured by Admin).
- 6. Set the **due date** for review completion.
- 7. Click **Submit for Review**. The document status becomes *In Review*.
- 8. Track status in the Document Review board. Each reviewer will be notified.

Document Review — board view showing documents at each review stage

## SOP 16

## Document Review — Reviewing &amp; Concurrence

|                    |                                                                                    |            |                               |
|--------------------|------------------------------------------------------------------------------------|------------|-------------------------------|
| <b>Purpose</b>     | Review an assigned document and record your concurrence or return it for revision. | <b>Who</b> | Designated document reviewers |
| <b>When to Use</b> | When notified that a document has been assigned to you for review.                 |            |                               |

**Procedure**

1. Click the **notification bell** to find documents assigned for your review. Or navigate to **Document Review** and check your queue.
2. Click the document to open its detail view.
3. Click **Open Document** to read the file in SharePoint.
4. Record your review decision: **Concur**, **Concur with Comments**, or **Return for Revision**.
5. Add your comments in the notes field (required for Return for Revision).
6. Click **Submit Review**. The document advances through the workflow once all reviewers concur.
7. Once all reviewers concur, the document moves to **Final/Signed** status. The submitter is notified.

**Note:** All review actions are logged in the system audit trail. Concurrence is recorded with your name, role, and timestamp.

|             |                                                                                                  |     |                      |
|-------------|--------------------------------------------------------------------------------------------------|-----|----------------------|
| SOP 17      | Admin — System Configuration                                                                     |     |                      |
| Purpose     | Configure system-wide settings: RAG thresholds, location lists, and SharePoint list connections. | Who | System Administrator |
| When to Use | At initial setup; when organizational parameters change; after SharePoint list migrations.       |     |                      |

Procedure

1. Click **Admin** in the top navigation bar.
2. **RAG Configuration:** Set the thresholds that determine when a project's status becomes Amber or Red (e.g., completion below 60% → Amber; blocked tasks > 2 → Red). Adjust and click Save.
3. **Location Configuration:** Manage the list of approved travel destinations. Add or remove locations as needed.
4. **SharePoint Setup:** View and update the SharePoint list IDs and site URL that PULSE-IPT uses as its data backend. Changes require a page reload.
5. **AI Configuration:** Enable or disable AI-assist features (if licensed). Set the AI context and persona.
6. After any configuration change, verify the change took effect by navigating to the affected module.

Admin — location list management

| SOP 18Admin — User & Role Management |                                                                                               |     |                      |
|--------------------------------------|-----------------------------------------------------------------------------------------------|-----|----------------------|
| Purpose                              | Add team members, assign roles, and manage functional area assignments.                       | Who | System Administrator |
| When to Use                          | When onboarding a new team member; when a member's role changes; during annual roster review. |     |                      |

Procedure

1. Click **Admin** in the top navigation bar and select the **Users & Roles** tab.
2. The user list shows all registered PULSE-IPT team members with their roles and functional areas.
3. To **add a user**, click **Add User**. Enter their name, email, and assign a role (Admin, PM, Member, Reviewer).
4. To **edit a user's role**, click the user row and change the Role field.
5. To **assign functional areas** (e.g., Engineering, Cyber, Contracts), check the applicable areas in the user detail panel.
6. To **remove a user**, click the row menu and select Remove. Their past actions remain in the audit log.

Admin — user and role management panel

|             |                                                                                        |     |                                       |
|-------------|----------------------------------------------------------------------------------------|-----|---------------------------------------|
| SOP 19      | Admin — Activity Log                                                                   |     |                                       |
| Purpose     | Review a complete audit trail of all actions taken in PULSE-IPT.                       | Who | System Administrator; Program Manager |
| When to Use | During compliance reviews; when investigating a data change; during incident response. |     |                                       |

Procedure

1. Click **Admin** in the top navigation bar and select the **Activity Log** tab.
2. The log shows all recorded actions: who performed them, what action, which module, and the exact timestamp.
3. Use the **search bar** to filter by user name, action type, or module.
4. Use the **date filter** to narrow the log to a specific date range.
5. Click any log row to expand the full action detail.
6. The log is append-only and cannot be edited or deleted by any user role.

## SOP 20

## Notification Settings

|                    |                                                                            |            |                     |
|--------------------|----------------------------------------------------------------------------|------------|---------------------|
| <b>Purpose</b>     | Configure which events generate notifications for your account.            | <b>Who</b> | All PULSE-IPT users |
| <b>When to Use</b> | At initial setup; when you want to reduce or increase notification volume. |            |                     |

## Procedure

1. Click the **notification preferences** icon (bell with gear) in the top right of the navigation bar.
2. The Notification Settings panel opens. Notification categories include: Task Updates, Document Review, Travel, Tickets, and System events.
3. Toggle each category on or off depending on your preference.
4. For each category, you can optionally choose to be notified only for items where you are the assignee/owner.
5. Click **Save Preferences**. Changes take effect immediately.

**Notification Settings**  
Choose how PULSE reaches you — channels, which areas can message you, and the tone. Changes save automatically.

All changes saved

**Delivery Channels**  
Turn email and Teams on or off independently. Areas below still control which notifications reach either channel.

☒ Email ☒ Teams

Your site admin can also disable Teams or email site-wide in Admin → Notifications — if that's off, it overrides this.

**Apps & Areas**  
Choose which parts of PULSE are allowed to notify you at all.

☒ Travel & Leave ☒ Document Review  
☒ Projects ☒ Weekly Meeting  
☒ Support Tickets ☒ Admin  
☒ PULSE

**Tone**  
How PULSE talks to you. This changes the greeting and sign-off — the actual facts never change.

**Robotic** (Selected)  
Plain and efficient — no small talk. This is how PULSE sounds today.  
 Travel & Leave  
 PULSE Travel: TR-0042 — Approved  
 Status is now Approved.

**Friendly**  
Warm and casual, like a coworker pinging you.  
 Hey Jordant!  
 PULSE Travel: TR-0042 — Approved  
 Status is now Approved.
